

Berny Dávila Aguilar

Full Stack Developer | Software Engineering Student

+506 6209-7471 | bernyd760@gmail.com | Alajuela, El Roble, Costa Rica

PROFILE SUMMARY

Full Stack Developer and Software Engineering student with hands-on experience building scalable web applications using Angular, React, Node.js, ASP.NET Core, and PHP.

Developed real-world systems including an e-commerce platform and a payroll management system, working across frontend and backend, implementing RESTful APIs, and designing efficient database solutions.

Strong foundation in object-oriented programming and problem-solving with C#, JavaScript, and SQL.

I am currently seeking an opportunity to gain professional experience and contribute to software development projects.

EDUCATION

Bachelor's degree in software engineering (In Progress)

2023 – Present

Technical National University (UTN), Alajuela, Costa Rica

EXPERIENCE

Full Stack Developer – Payroll Management System

2026

Alajuela, Costa Rica

- Built a complete payroll system managing employee records, salaries, and payment processing for 50+ employees.
- Developed a dynamic, responsive frontend using Angular with modular component architecture.
- Designed and implemented RESTful APIs with Node.js and Express for payroll calculation and reporting.
- Architected and managed a normalized MySQL database with optimized queries for payroll data.
- Applied clean code principles and MVC structured architecture throughout the project.

Full Stack Developer – Automotive Parts E-Commerce

2025

Alajuela, Costa Rica

- Developed a full-stack e-commerce platform supporting a catalog of 200+ automotive parts with search and filtering.
- Built a responsive React frontend integrated with a PHP MVC backend via REST APIs.
- Designed and optimized a MySQL database schema for efficient product, order, and inventory management.
- Improved UI/UX using Bootstrap, reducing friction in the product browsing and checkout flow.
- Used Git and GitHub for version control, branching strategy, and team collaboration.

TECHNICAL SKILLS

Frontend: Angular, React, HTML5, CSS3, Bootstrap

Backend: Node.js, Express, ASP.NET Core, PHP (MVC)

Languages: JavaScript, TypeScript, C#, Java, PHP

Databases: MySQL, SQL Server, Oracle Database

Tools: Git, GitHub, REST APIs, Axios, Postman, REST Client

Concepts: POO, MVC, CRUD, Agile/Scrum basics

LANGUAGES

Spanish: Native

English: Basic

CERTIFICATIONS

- JavaScript Essentials 1 – Cisco Networking Academy (2025)
- JavaScript Essentials 2 – Cisco Networking Academy (2025)
- Academic Process Mining Fundamentals – Celonis Academy (2025)

SOFT SKILLS

Strong teamwork and communication • Proactive and results-oriented • Adaptable and fast learner • Committed to continuous improvement
